

License Management Guide

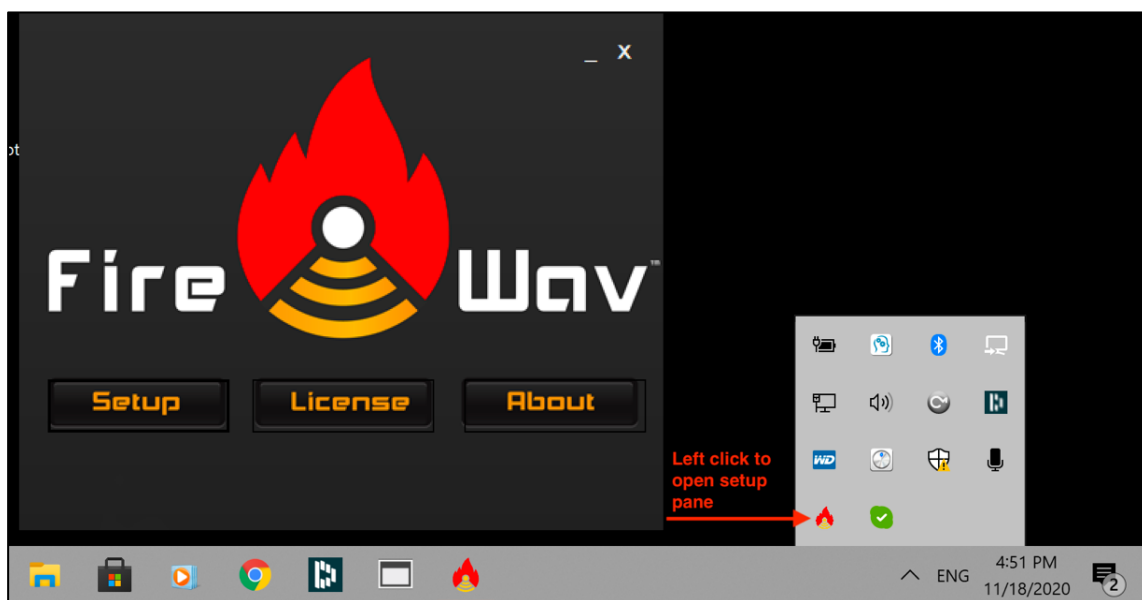

The FireWav app comes with a free 7-day demonstration period. Thereafter, a paid license agreement is required. License agreements come in three options:

- **Monthly** – a month-at-a-time payment paid at the first of each month, automatically renewed at the beginning of the month, but cancelable at any time before the beginning of a new month.
- **Annual** – a full year of uninterrupted use of FireWav, paid in advance, automatically renewed unless canceled before the beginning of the new year.
- **Lifetime** – a one-time payment ensures a lifetime of listening excitement. There are no other payments required. Occasional updates and new features are included.

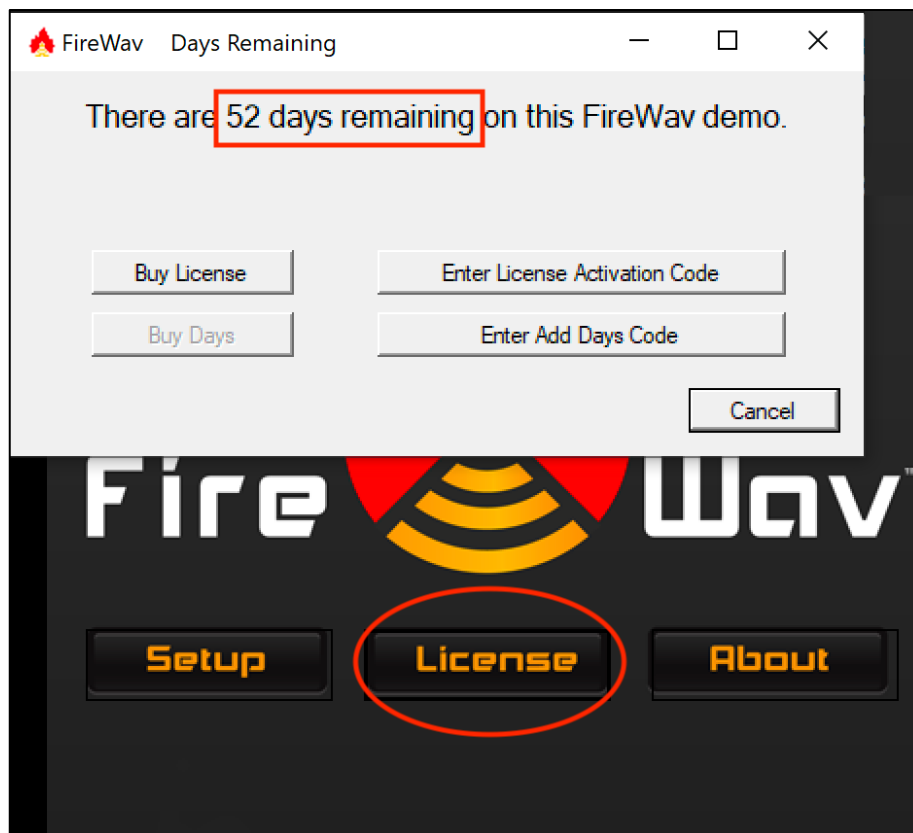

Licenses are valid for one computer only. Contact FireWav support for computer upgrades or replacements requiring the issuance of a new authorization code.

1. The installation is free for 7 days before a license must be purchased to add days, or a FireWav subscription purchased for uninterrupted service.

Left click on the FireWav icon in the hidden icons panel to reveal the setup panel.

2. Click on **License** to confirm how many days remain on the license or to add more time.

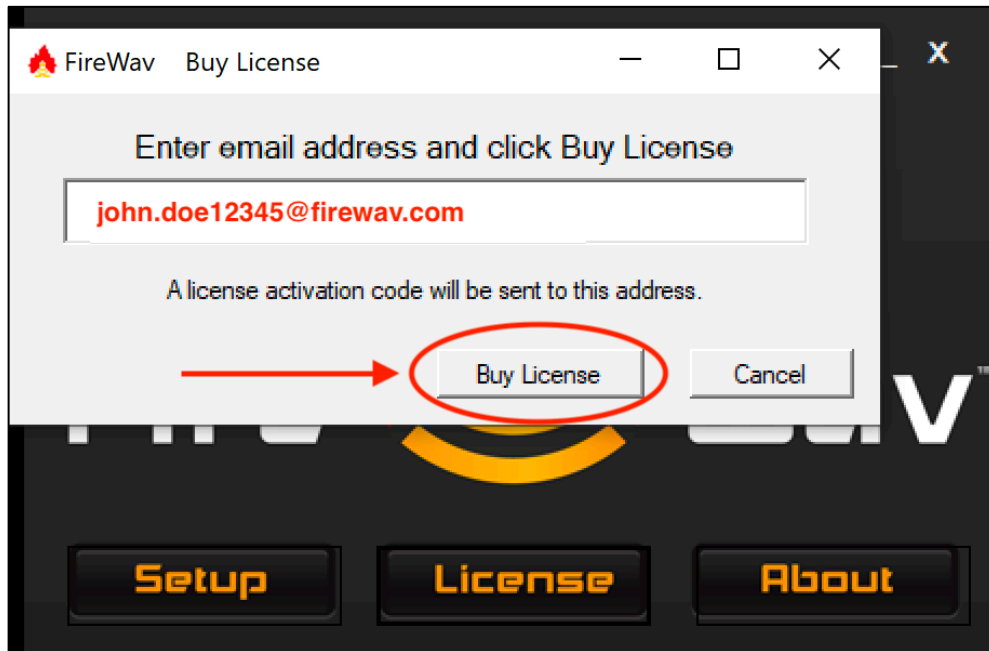

THE INSTALLATION IS FREE FOR 7 DAYS BEFORE A LICENSE MUST BE PURCHASED TO ADD DAYS, OR A FIREWAV SUBSCRIPTION PURCHASED FOR UNINTERRUPTED SERVICE.

3. The easiest way to use FireWav is to purchase a subscription which will automatically manage license expiration dates, recurring payments, and updates of the license codes inside FireWav.
4. The manual "pay as you go" license process has three steps, and requires two separate codes:
 - Submit an email address to register your request
 - Receive and register an **activation** code
 - Receive and register an **"add days"** code

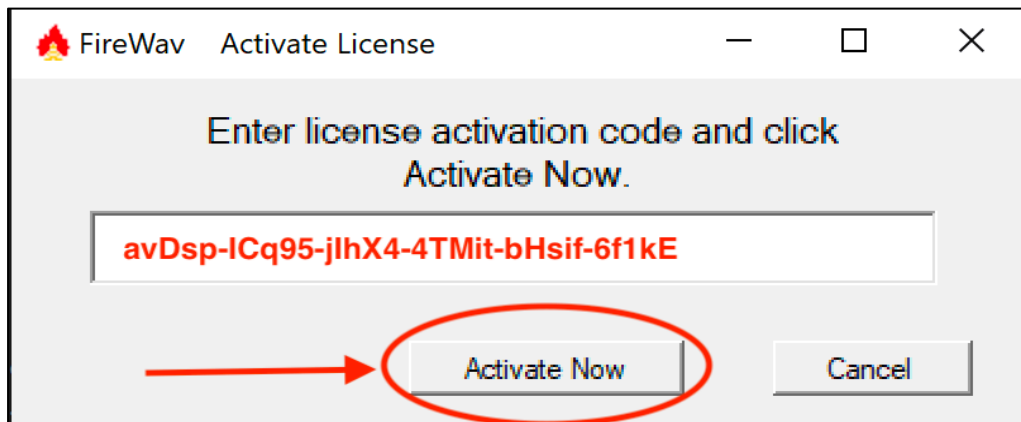

Once the activation is complete, any additional license activity will be reduced to a single step each time more days are required.

The next steps demonstrate the manual process to request and buy additional days.

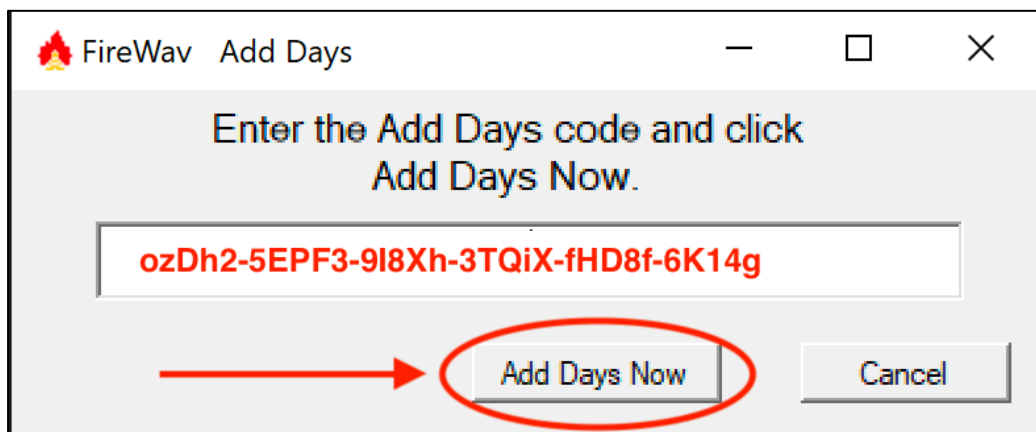

5. **First**, submit your email address. Click on the Buy License button to open the Buy License panel. Add your email address and click on the **Buy License** button to register your computer.

6. **Second**, receive an email with the activation code. Copy and enter the activation code into the activation field. Click the **Activate Now** button.

7. **Third**, receive a second email with the add days code. Copy and enter the code into the add days field. Click **Add Days Now**

8. You can change from a monthly pay-as-you-go plan to any subscription plan at any time.
